<p><b>CORE IDEAS</b></p> <p><b>PS2.A Forces and Motion</b> The motion of an object is determined by the sum of the forces acting on it; if the total force on the object is not zero, its motion will change. The greater the mass of the objects, the greater the force needed to achieve the same change in motion. For any given object, a larger force causes a larger change in motion.</p> <p>All positions of objects and the directions of forces and motions must be described in an arbitrarily chosen reference frame and arbitrarily chosen units of size. In order to share information with other people, these choices must also be shared.</p> <p><b>SCIENCE and ENGINEERING PRACTICES</b></p> <p><b>Planning and Carrying Out Investigations</b> Plan an investigation individually and collaboratively, and in the design; identify independent and dependent variables and controls, what tools are needed to do the gathering how measurements will be recorded, and how many data are needed to support the claim.</p> <p><b>Scientific Knowledge is Based on Empirical Evidence</b> Science knowledge is based upon logical and conceptual connections between evidence and explanations.</p> <p><b>CROSSCUTTING CONCEPTS</b></p> <p><b>Stability and Change</b> Explanations of stability and change in natural or designed systems can be constructed by examining the changes over time and forces at different scales.</p>	<p><b>PERFORMANCE EXPECTATION</b></p> <p><b>MS-PS2-2</b> Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.</p>	<p><b>RESOURCES:</b> <i>Smithsonian Science and Technology Concepts™ Working with Motors and Simple Machines Unit Lessons 1; 6-8</i></p> <p><b>SUBCONCEPT 1</b>– Students have ideas, preconceptions, and misconceptions about motors, work, and machines. <b>Lesson 1</b></p> <p><b>SUBCONCEPT 3</b>– Machines make work easier by reducing the effort force needed to do a given amount of work. <b>Lessons 6-8</b></p> <p><i>-Inquiry Investigations</i> <i>-Science Notebooking</i> <i>-Student Guide</i> <i>-Hands-on Equipment</i> <i>-Creating Models</i></p> <p><b>TWIG</b> <a href="http://www.twigcarolina.com">www.twigcarolina.com</a> <b>Motion; Force; Machines; Levers, Wheels, Pulleys</b></p>	<p><i>Smithsonian Science and Technology Concepts™</i> <b>Integrated FERA Cycle Instruction of</b> Crosscutting concepts and science and engineering practices with science core ideas</p> <p><b>FOCUS Strategies include:</b> -pre-teaching activities such as brainstorming, KWL charts, anticipation guides, etc. -guiding/focus questions</p> <p><b>EXPLORE Strategies include:</b> -inquiry-based discussions and investigations -classroom activities, inquiries and models to help students develop a further understanding of the concepts/core ideas being discussed</p> <p><b>REFLECT Strategies include:</b> -Science Notebooking -Key Ideas -Academic Vocabulary</p> <p><b>APPLY Strategies include:</b> -Venn diagrams, cause and effect charts, review games, engineering application lessons, etc.</p> <p><b>COMMON CORE</b> <b>Reading Informational Text RI.1-9:</b> RI.1-3 Key Ideas and Details RI.4-6 Craft and Structure RI.7-9 Integration of Knowledge and Ideas</p> <p><b>Writing W.1-9</b> W.1-3 Text Types and Purpose W.4-6 Production and Distribution of Writing W.7-9 Research to Build and Present Knowledge</p> <p><b>GUIDING QUESTIONS</b> <i>How can one predict an objects continued motion, changes in motion or stability?</i></p>	<p><b>RESOURCES:</b> <a href="http://www.carolinascienceonline.com">www.carolinascienceonline.com</a></p> <ul style="list-style-type: none"> <li>Interactive Whiteboard Activities</li> </ul> <p><a href="http://www.tigttagcarolina.com">www.tigttagcarolina.com</a></p> <ul style="list-style-type: none"> <li>Video Sets related to Newton, Motion</li> </ul> <p><a href="http://www.mysi.edu">www.mysi.edu</a> Smithsonian information website</p> <p><b>DEVICES:</b></p> <ul style="list-style-type: none"> <li>iPads</li> <li>Tablets</li> <li>Chromebooks</li> <li>ELMO</li> <li>SMARTboard</li> </ul> <p><b>SOFTWARE:</b></p> <ul style="list-style-type: none"> <li>Microsoft Powerpoint</li> <li>Microsoft Word</li> <li>SMARTboard activities</li> </ul>	<p><b>INTERVENTIONS:</b> <i>Smithsonian Science and Technology Concepts™</i></p> <ul style="list-style-type: none"> <li>Science Notebooks</li> <li>Extensions</li> </ul> <p><b>ASSESSMENTS:</b> <i>Smithsonian Science and Technology Concepts™</i> Working with Motors and Simple Machines Unit</p> <p><b>Lesson 1 Pre-Assessment</b> <i>Students complete a circuit of five inquiries that introduce them to the concepts they will study in the unit.</i></p> <p><b>Lesson 12 Assessment</b> <i>Students complete a performance assessment to demonstrate their knowledge of the concepts in the unit.</i> -FORMATIVE -SUMMATIVE</p> <p><b>Science Notebooks</b></p> <p><b>Inquiry Data Sheets</b> <b>Investigation Follow-up Questions</b></p>
