Elmwood Park High School  
*Office of the Assistant Superintendent / CSBO*

March 7, 2022

Parents, Students and Staff Members:

Beginning on Monday, March 28, 2022, EHS Industries, Inc. an asbestos abatement contractor licensed by the Illinois Department of Public Health will conduct an asbestos abatement project at John Mills Elementary School. The project includes the removal of asbestos containing pipe insulation in the basement boiler room.

Elmwood Park School District has retained an independent third party environmental consulting firm, TRC Environmental Corporation, to provide oversight for the project to ensure that the work is performed in accordance with applicable rules and regulations. A representative of TRC will be on-site full time monitoring the asbestos contractor's removal operation.

During the removal process, procedures outlined by the Illinois Department of Public Health (IDHP), Occupational Safety and Health Administration (OSHA) and Environmental Protection Agency (EPA) will be followed. Throughout the abatement project, the area to be abated will be cordoned off from the remainder of the building.

We appreciate your cooperation and patience with this anticipated project. If you have any questions or require additional information, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "James P. Jennings".
