

Exemption Form 6th Grade Opting out of Puberty & HIV/AIDS

I have reviewed the materials for the sixth grade **Unit on HIV/AIDS Education**, and would like to opt my child out of this unit. I understand my child will be provided with an alternative assignment contract (on the back of this form) during this time.

I also understand my child will miss instruction in the following Washington State required Health state standards:

1. Understand the concepts and factors of communicable and non-communicable diseases, airborne and bloodborne pathogens, as well as the transmission and contraction of the various types of Hepatitis.
2. Refusal skills, saying no to peer pressure, as well as skills to improving positive self-image.
3. Understand human life functions and the interconnecting organ systems necessary to maintain human life.

Since the above standards will be covered on the state classroom based assessments in Science and Health at 8th and 10th grades, your signature below indicates this information will taught at home.
