

Social & Behavioral Science

Upon successful completion of the general education requirements and the suggested program requirements for an Associate Degree the student shall:

1. Define the basic core areas of the social sciences.
2. Interpret the primary structure of the U.S. from a historical, governmental, psychological or sociological perspective in terms of global culture and diverse society.
3. Recognize some aspects of the differing disciplines in the social sciences to the analysis of current events in the news.
4. Explore the relationship of the individual and the greater society from a historical, governmental, psychological or sociological perspective as it affects personal behavior, social development and quality of life of the individual, family and community.
5. Recognize and compare political, geographical, social, cultural, religious and intellectual institutions, structures, and processes across a range of historical periods and cultures.
6. Recognize the contributions of past cultures/societies to the contemporary world and think critically about how individuals are influenced by them.
