CCC Program Outcomes – Updated 2/14/19

Math/Science Division—Math Program

Upon successful completion of the general education requirements and the suggested program requirements for an Associate Degree the student shall:

1. Use algebraic techniques to manipulate & solve equations and inequalities.
2. Understand and use functional notation.
3. Graph functions in both Cartesian and polar coordinate systems.
4. Apply mathematical techniques to problems involving other disciplines and the real world.
5. Apply differential techniques to solving problems.
6. Apply Integration techniques to solving problems.
7. Solve different trigonometry identities.
8. Determine convergence or divergence of a series by using different tests for series.
9. Apply the technique of LaPlace transforms to solving differential equations.
