

Brunswick HS Feasibility Study

Background and Process

FCPS is beginning a feasibility study to determine the best way to modernize and possibly expand Brunswick High School. The feasibility study will identify school renovation and space needs in order to develop a scope of work and cost estimates for a future modernization project. FCPS will consider the existing building’s physical condition as well as the building’s ability to provide our current educational programs.

During the feasibility study, staff will work with a consultant to consider several options. This study is the first step in the process to modernize and possibly expand Brunswick High School. The feasibility study will start in January 2019 and conclude in June 2019. There will be opportunities for community members to participate throughout the study. All feasibility study meetings are open to the public (see website for info).

Community Meetings

Schedule for Brunswick HS Modernization

The current proposed timeline for the project is shown below, contingent on funding from the State and County. However, the FCPS capital improvement program is evaluated each year and project schedules are subject to change.

School Year	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24
Brunswick High School Modernization Schedule	Feasibility Study		Design	Construction		Modernized Brunswick HS opens

More information about the project will be posted on the FCPS website at:
