

Costco Optical Announcement for Vision

UnitedHealthcare Vision is pleased to announce the addition of Costco Optical to our growing network of vision providers effective February 1, 2013. The retail chain adds 420 store locations nationally and over 420 optometrists to our national network of 35,000 access points. Costco Optical is ranked #5 nationally as a key optical player based on 2011 sales according to Vision Monday's Top U.S. Optical Retailers 2012.

We recognize the importance of choice for our members in selecting a provider for their eye care needs. That's why we pride ourselves on being able to offer a robust and well-balanced network of both private practice and retail chain locations on a national and regional basis. This addition to our network will be an exciting option for members who enjoy the added value and convenience that Costco offers.

Members will be able to find participating Costco providers by visiting <https://www.myuhcvision.com>, and searching for participating locations in their area.

Please keep in mind that UnitedHealthcare Vision members must have a valid Costco membership in order to purchase materials at Costco Optical. A Costco membership is not required to receive an exam.
