

INDEPENDENT SCHOOL DISTRICT 93  
Carlton Minnesota 55718

Dear Parents and Families,

Now that kids have returned to school, we encourage every family to get tested for COVID-19. Current recommendations from Minnesota Department of Health say that any children who spend time near people outside their immediate household should get tested every two weeks, through the end of the school year. See [COVID-19 Testing for Kids and Families](#).

Testing has never been easier – you can visit a community testing site, order an at-home test kit, or get tested through your health care provider. All options are quick and free to you.

You can sign your entire family up to get tested at the same time at a community testing site. If someone in your family prefers to speak in another language besides English, in-person or language line assistance is available. Test sites are doing everything they can to make sure sites are clean, safe, and comfortable for everyone.

Teachers, school staff, and coaches are already getting tested regularly. We owe it to them to do the same. By wearing a mask and getting tested regularly, we can help limit the spread of COVID-19 and keep our schools and sports open.

Visit [Getting Tested for COVID-19](#) or contact your health care provider to schedule an appointment.

Sincerely,

Stacie Godbout, RN, LSN  
Carlton School Nurse
