

iPad: Apps – Quitting and Switching

You may want to switch between apps while working on a task. You can do this easily without having to quit your task each time you want to change.

- Double tap the home button
- This will cause the screen to zoom out, showing you all the apps that you currently have open

Small Screen Shot of the App

Name of the App

- You can scroll left or right to see what apps you have open
- You can tap directly on the screen shot to switch between apps

When you find the app you want to close, tap and swipe up on the window you want to close

Tap and Swipe up to close app
