

IS499 – CAPSTONE: An Academic Senior Level Integrative Experience
DONNELLY COLLEGE
Spring 2018
By Arrangement
3 Credit Hours

INSTRUCTOR INFORMATION:

Name: Ana M. Valdez

Office: Room 602

Office hours: Monday, Tuesday, and Thursday: 11:00AM to 6:00PM, Wednesday: Noon – 6:00PM and Friday: 9:00 AM to 3:00PM

Telephone: 913-621-8717

E-mail address: avaldez@donnelly.edu

Web site address: www.donnelly.edu/academics/bachelor

COURSE DESCRIPTION:

Information Systems (IS) 499 is the CAPSTONE course for the senior level integrative experience. The Bachelor of Science candidate(s) will complete one of the following: an internship, a practicum experience, a project, or some other measurable means initiative to demonstrate program outcomes and objectives. The candidate(s) identify the initiative by completing research or other acceptable means. The candidate(s) present their initiative proposal to the professor for approval. The candidate(s) will develop the design approach and steps for implementation of the approved initiative. The candidate(s) will implement, analyze, and present findings on their approved initiative. The course design is to show synthesis of the learning experience, and demonstrate program outcomes while emphasizing the program learning objectives.

PREREQUISITES:

Senior level academic standing

REQUIRED TEXTBOOK & SUPPLIES: Some projects or internships will necessitate specific reading, and therefore a text may be required. After approval of the initiative is given, the professor and student will choose the appropriate text.

PHILOSOPHY OF GENERAL EDUCATION:

Donnelly College has consistently maintained a strong commitment to the liberal arts and sciences as a foundation for a complete education. The faculty strongly believes that the liberal arts and sciences provide the context through which students can engage with the larger questions about students' place in the world and their pursuit of truth. Therefore, the College's general education requirements are designed to ensure that liberal arts and sciences graduates develop a breadth of content knowledge and the skills and abilities, which will enable them to become educated participants in a diverse global community.

DONNELLY COLLEGE LEARNING OUTCOMES:

1. **Communication Skills:** Students will communicate effectively in writing and speaking.
2. **Technology and Information Literacy Skills:** Students will demonstrate proficiency in information literacy skills.
3. **Symbolic Problem Solving:** Students will demonstrate competency in qualitative and quantitative problem solving.
4. **Analytical Thinking:** Students will employ reflective thinking to evaluate diverse ideas in the search for truth.
5. **Personal and Interpersonal Skills:** Students will develop an understanding across cultural differences locally, nationally, and internationally.
6. **Academic Inquiry:** Students will engage independently and effectively in lifelong learning.
7. **Values:** Students will demonstrate moral and ethical behavior in keeping with our Catholic identity.

PROGRAM LEARNING OUTCOMES:

In addition to the general education learning outcomes – communication skills, technology and information literacy skills, symbolic problem solving, analytical thinking, personal and interpersonal skills, academic inquiry, and values – upon successful completion of the Information Systems Baccalaureate program the student will demonstrate:

1. Effective communications as part of multidisciplinary teams with a wide range of people.
2. The use of techniques, skills, and modern computing tools necessary for technological practice.
3. An aptitude to analyze qualitative and quantitative data to make informed decisions.
4. The ability to gather information to design a system, component, or process that meets desired outcomes.
5. The capacity to understand the impact and ramifications that technology has in a global, national, and local context.
6. A recognition of the need for, and a willingness to engage in life-long learning through a continuous investigation of contemporary issues.
7. The capacity to make informed decisions in computing practice based on an understanding of professional, legal, and ethical responsibilities.

STUDENT LEARNING OUTCOMES:

1. Students will have the ability to complete a Capstone project through an oral and written presentation.
2. Students will have the ability to show mastery of their decision-making process.
3. Students will have the ability to articulate and apply interpersonal, conceptual, and technical skills.
4. Students will have the ability to differentiate between the impact of ethical behavior, or lack thereof, on the Capstone project.

Donnelly College Learning Outcomes	Program Learning Outcomes¹	Student Learning Outcomes²	Application and Assessment³
Students will communicate effectively in writing and speaking.	The student will demonstrate effective communications as part of multidisciplinary teams with a wide range of people.	Students will have the ability to complete a capstone project through an oral and written presentation.	Students will achieve an 80% passing average on a Capstone project.
Students will demonstrate proficiency in information literacy skills.	The student will demonstrate the use of techniques, skills, and modern computing tools necessary for technological practice.		
Students will demonstrate competency in qualitative and quantitative problem solving.	The student will demonstrate an aptitude to analyze qualitative and quantitative data to make informed decisions.		
Students will employ reflective thinking to evaluate diverse ideas in the search for truth.	The student will demonstrate the ability to gather information to design a system, component, or process that meets desired outcomes.	Students will have the ability to show mastery of their decision-making process.	
Students will develop an understanding across cultural differences locally, nationally, and internationally.	The student will demonstrate the capacity to understand the impact and ramifications that technology has in a global, national, and local context.	Students will have the ability to articulate and apply interpersonal, conceptual, and technical skills.	
Students will engage independently and effectively in lifelong learning.	The student will demonstrate a recognition of the need for, and a willingness to engage in life-long learning through a continuous investigation of contemporary issues.		
Students will demonstrate moral and ethical behavior in keeping with our Catholic identity.	The student will demonstrate the capacity to make informed decisions in computing practice based on an understanding of professional, legal, and ethical responsibilities.	Students will have the ability to differentiate between the impact of ethical behavior, or lack thereof, on the Capstone project.	

COURSE REQUIREMENTS:

Activities (3 activities)	25%
Assignments (2 papers)	25%
Final presentation (PowerPoint & Oral presentation)	40%
Attendance	<u>10%</u>
	100%

GRADING POLICY:

1. Project Planning Phase	150
Proposal (50 points)	
Project Proposal Paper (50 points)	
Vision Board (50 points)	
2. Project Implementation Phase	100
Project Paper (75 points)	
Project Portfolio (25 points)	
3. Project Conclusion Phase	200
Written (100 points)	
Oral (100 points)	
4. Attendance (5 points per meeting)	<u>50</u>

500

1. Project Planning Phase:

ACTIVITY#1: Project Proposal (50 points) – Write a three-page Project Proposal detailing your concept for the project (use APA guidelines). The proposal is due within the first two weeks of the semester. Proposal should be a WORD document that includes the following:

- Description – Summarize the project
- Purpose – What is the purpose of proposed project and how will it be accomplished
- Expected Outcomes – How will the project be measured and potential actions
- Technical Knowledge - How will technical skills learned, and theoretical knowledge gained will be utilized or displayed through the project
- Financial – Needs or estimated project budget (if applicable or known)

ASSIGNMENT A: Project Paper (50 points) – Write a five-page paper based on the Project Proposal, include the following information:

- Project – By utilizing the approved proposal write a five-page paper that details the proposal and addresses the sustainability of the project (if it is intended to continue).
- Timeline – Provide a detailed timeline on each step of the project up to and including implementation.
- Research – Include any research on the impact of implementing this project (i.e., why this is important, how it influences the target market, etc.). If completing an internship, include information about the organization served, and research about why they exist.
- Process – Detail the planning process including any barriers encountered (i.e., in the planning stage or obtaining the permission to do the project).
- Reflection – Describe what your level of technological knowledge/concepts were when you started the Baccalaureate program and how that knowledge has evolved throughout the course of the program. This section should also address in more detail how you will use your technical skills to accomplish the project.

ACTIVITY #2: Vision Board – (50 Points)

- Create a VISION BOARD for the project – Include any ideas that you have about the project or work that is planned or sources that inspire the project. Use graphical depictions for this item.
- Address the seven Learning Outcomes of the program listed above in Course Requirements.

2. Project Implementation Phase:

ASSIGNMENT B: Project Paper – (75 Points): In a written 5-page paper using APA guidelines:

- Detail the process used to implement the project/internship, include challenges that arose that changed or affected original course of action; address how the obstacles were managed.
- Discuss the objectives or the problems you actually addressed with your project.

- c. Discuss the actual outcomes (both measurable and intangibles).
- d. Include any ethical issues or concerns that occurred.
- e. Reflection - Describe current personal style.

ACTIVITY #3: Project Portfolio – (25 Points)

- a. Create a portfolio for the project – Include any work accomplished, reference documents, photos and the approved Proposal and Paper.
- b. The portfolio should address the seven Program Learning Outcomes.

3. Project Conclusion Phase:

ASSIGNMENT C & D: Presentation – Oral & Written (200 points)

- a. ASGNC: Create a formal presentation using PowerPoint illustrating the projects findings. Include the following: highlights of the project; the impact of the project on the target market; technical skills used; and how the learnings from the IS program helped accomplish the project.
- b. ASGND: Oral presentation to include the following: highlights of the project; the impact of the project on the target market; technical skills used; and how the learnings from the IS program helped accomplish the project.

Rubric for Written & Oral Presentation (FINAL – 200 points)

ASSIGNMENT C – Criteria	WRITTEN PRESENTATION	Pts
Demonstrated understanding and application of technical style	<i>Displayed mastery of their decision-making process using applicable leadership theories</i>	<input type="text" value="25"/> pts
Displayed aptitude to analyze qualitative and quantitative data to make informed decisions	<i>Articulated and applied interpersonal, conceptual, technical skills of an effective leader</i>	<input type="text" value="25"/> pts
Students demonstrated a scholarly approach to written communications	<i>The information provided is relevant to the topic</i>	<input type="text" value="25"/> pts
Leveraged appropriate technological approach for the project	<i>Did the student review research and incorporate it appropriately into the document?</i>	<input type="text" value="25"/> pts
		100 POINTS

ASSIGNMENT D – Criteria	ORAL PRESENTATION	Pts
Appropriately applied technological theory and behavior in project	<i>Displayed mastery of their decision-making process using applicable technology theories</i>	<input type="text" value="25"/> pts
Appropriately applied technology in project	<i>Articulated and applied technical skills</i>	<input type="text" value="25"/> pts
Demonstrated a scholarly approach to oral communications	<i>The information provided was relevant to the topic</i>	<input type="text" value="25"/> pts
Service leadership to others was displayed in project	<i>Displayed compassion and care for others that might not otherwise be served</i>	<input type="text" value="25"/> pts
		100 POINTS

GRADING SCALE:

- A = 450 – 500 Points
- B = 400 – 449 Points
- C = 350 – 399 Points
- D = 300 – 349 Points
- F = ≤ 299 Points

ACADEMIC INTEGRITY: “...Academic integrity is to be maintained at all times to insure genuine educational growth. Cheating and plagiarism in all forms, therefore, will be subject to disciplinary action. Serious infractions will be reviewed by an ad hoc committee, appointed by the appropriate dean. Appropriate sanctions will be imposed.”

PLAGIARISM: Plagiarism – the appropriation or imitation of the language or ideas of another person and presenting them as one’s original work – sometimes occurs through carelessness or ignorance. Students who are uncertain about proper documentation of sources should consult their instructors.

ACCOMMODATIONS: In compliance with the Americans with Disabilities Act, Donnelly College will make every attempt to provide equal access for persons with disabilities. Students in need of accommodations must request them in writing from the Vice President of Academic Affairs.

CIVILITY & DECORUM: As noted in its Code of Conduct, Donnelly College is committed to maintaining an overall atmosphere of civility and respect. Civility and decorum both inside and outside the classroom are fundamental foundations of the values at Donnelly College. Classroom discussions and interactions outside the classroom will at all times be focused on the learning process and should always be respectful of both students and faculty. In open discussions of ideas and issues, disagreements should focus on ideas and facts. Name calling and assaults (either in person or on-line) will not be tolerated. Should any problems occur, the instructor should be notified immediately. Those who do not comply with civility and decorum requirements may be subject to a grade reduction and/or other sanctions up to and including dismissal from Donnelly College.

ATTENDANCE POLICY: Attending class is **NOT** an option. Class participation and attendance is required. Class Participation: Students are expected to “hit the ground running” which means you need to be prepared and contribute in class from day one. Missing more than two sessions may cause a drop in your grade.

WITHDRAWAL FROM COURSES OR FROM SCHOOL: It is the responsibility of the student to withdraw from class. If a student decides to withdraw from a class, ideally, they should see an advisor and the financial aid staff before taking the withdrawal form to the Registrar's office for processing. However, any verifiable contact (e-mail, fax, phone, mail, etc.) with authorized college personnel expressing the student's intent to withdraw from a class will be honored.

If students withdraw before they have earned their financial aid, they will owe Donnelly College a debt for the unearned portion of the financial aid as well as for any unpaid balances (subject to the College's refund policy). Not attending class is not a withdrawal from class.

Donnelly College reserves the right to withdraw a student from class(es) if the student does not meet their financial obligations, including two missing or incomplete payments, or loss of financial aid. Faculty may initiate an administrative withdrawal on the basis of non-attendance. In extreme circumstances (i.e. a disciplinary problem), the Vice President of Academic Affairs may initiate an administrative withdrawal. The student remains responsible for the tuition owed in this instance.

The deadlines for withdrawing from classes are as follows:

14 to 16 weeks	3 weeks before the end of the class
6 to 8 weeks	7 weekdays before the end of class
4 to 5 weeks	4 weekdays before the end of class
Less than 4 weeks	Withdrawals are not allowed

Withdrawal deadline dates will be published in the academic calendar.

TENTATIVE COURSE CALENDAR:

The schedule is subject to change based on the progress or needs of the class.

Class Meeting	Classroom/Laboratory Protocol	Assignments
1	Discuss: <ul style="list-style-type: none"> • Introductions • Overview of syllabus • Discussion of expectations • Review of all learning outcomes • Project brainstorming 	
2	Discuss approved projects / internships: <ul style="list-style-type: none"> • Focus of project • Reason for doing project • Ethical concerns • Leadership style reflection • Potential issues • Expected outcomes 	
3	Discuss status of your plan and report with a focus on: <ul style="list-style-type: none"> • Issues encountered • Refining a focus • Utilizing personal network for support • Discovered research • Evolution of personal leadership style 	<p><u>Project Planning Phase</u></p> <p>ACTIVITY#1: Project Proposal (50 points) – Write a three-page Project Proposal detailing your concept for the project (use APA guidelines). The proposal is due within the first two weeks of the semester.
