### **Technology System Use and Internet Safety Policy**

The Board of Education of Kildeer Countryside Community Unit School District No. 96 hereby determines that it is in the best interests of the District, its personnel and its students, and members of the community to promote the use of and familiarity with the District Technology System and with the services which are available through that System to support learning and enhance instruction, and to improve communications between the school and community.

Knowledgeable and appropriate use of the District Technology System can facilitate access to information resources available on-line, create innovative learning environments, and provide for worldwide communication. For purposes of this policy, implementing rules, and acceptable use guidelines, the term "District Technology System" or "System" shall include all computer hardware and software owned or operated by the District, District electronic mail, District web sites, and District on-line services and bulletin board systems. "Use" of the District Technology System shall include use of or obtaining access to the System from any computer terminal whether or not owned or operated by the District.

The District Technology System was established to comprise part of the school curriculum, and is intended by this Board to function in support of that curriculum and of students' mastery of the curriculum through improved communication between the school and students, parents or guardians. The District Technology System does not constitute a public forum. The District reserves and retains the right to regulate the content of and links to the District Technology System. The District also has the right to and does monitor use of its Technology System. Except as provided by federal and state statutes protecting the confidentiality of students' education records, no user of the District Technology System has an expectation of privacy in connection with such use.

The Board of Education recognizes that although the Internet and on-line services afford access to legitimate sources of information for academic and educational purposes, they also enable access to materials which may be illegal, obscene or indecent. The use of elements of the District Technology System including the Internet shall be consistent with the District's educational mission and the curriculum adopted by the Board.

With respect to any of its computers with Internet access, the District will use technology protection measures to (A) protect minors against access through such computers to visual depictions which are obscene, constitute child pornography, or are otherwise harmful to minors, and (B) protect all users against access through such computers to visual depictions that are obscene or constitute child pornography.

The Board of Education further recognizes that the effective operation of the District Technology System depends upon the existence and enforcement of guidelines for the efficient, ethical and legal use of its resources. The Administration is authorized to and shall adopt and enforce guidelines which limit the use of the System to educational purposes, and describe acceptable and ethical use of the System.

The guidelines shall, among other points, address:

- \* access by minors to inappropriate matter on the Internet and World Wide Web;
- \* the safety and security of minors when using electronic mail, chat rooms, and other forms of direct electronic communication;
- \* unauthorized access, including "hacking" and other unlawful activities by minors and other users online;

- \* unauthorized disclosure, use, and dissemination of personal identification information regarding minors; and
- \* measures designed to restrict minors' access to materials harmful to minors.

Such guidelines shall be distributed to District employees and students and other members of the District No. 96 community who are afforded access to the System.

Violation of the acceptable use guidelines shall be subject to consequences including but not limited to discipline, loss of System use privileges, and referral to law enforcement authorities or other legal action in appropriate cases.
