

Continuing to Provide Personalized Education
Strategic Planning Session 3: Action Steps to Enable the Vision
October 16, 2014

How Do We Get There

On October 16, thirty five (35) Woodbury citizens, Board of Education, teachers and staff, administration and students came together to continue their strategic planning work – bringing our total number of individual attendees to one hundred six (106) over the course of the three sessions to date. The focus of Session 3 was to identify action steps the Board could consider when crafting their strategic plan. The identified action steps would provide the roadmap to achieving the goals that emerged during Planning Session 2.

What follows is a summary of the work done at the October 16 meeting. Listed are the six goal areas of work: Technology, Students, Communication/Community, Curriculum, Finance/Facilities and Families. Work of the small groups is listed under each goal area with their consensus statements appearing first followed by the additional ideas contributed through the circulation of the goals across all small working groups. Each participant had an opportunity to contribute action step ideas for each goal area.

We hope to see you at the next meeting ... please bring another person with you!
