Skokie School District 73½ Certificate of Physical Fitness for Participation in Athletics School Year 2025-2026

Students are given the opportunity to participate in the following sports: Soccer, Basketball, Cheerleading, and Volleyball. **This form must be filled out and turned in prior to any participation.**

Student Name: Grade	2:	
Date of Birth:		
Medical Permission (I	For <u>DOCTOR t</u> o complete):	
An annual physical is req the entire school year to		Physicals must be dated after June 1st in order to be valid for
Student's Medical History:	Heart Condition Yes No	
	Allergies Yes No	
	Diabetes Yes No	
	Epilepsy Yes No	
	Asthma YesNo	
	Other:	
Any injuries and/or surgical	procedures during the past year? (i	nclude dates)
Has the student's physical a	ctivity been restricted during the pa	st year? YesNo
= -		
Is the student currently taki	ng any medication? Yes No	
If yes, please provide name	of medication frequency, dosage, a	nd reason for taking:
		A.P.N. or Physician's Stamp (Required)
On the basis of the examina	tion today, I find this student	
physically fit for athletic par	rticipation in interscholastic	
sports for 395 days from thi	is date.	
	Date	_
(Signature of Licensed Ph	ysician, Advanced Practice Nurse	, Physician's Assistant)
Name	Address	Date

You must also submit the Skokie School District 73 ½ Permission and Insurance Form for Athletics.

Concussion Information Sheet

A concussion is a brain injury and all brain injuries are serious. They are caused by a bump, blow, or jolt to the head, or by a blow to another part of the body with the force transmitted to the head. They can range from mild to severe and can disrupt the way the brain normally works. Even though most concussions are mild, all concussions are potentially serious and may result in complications including prolonged brain damage and death if not recognized and managed properly. In other words, even a "ding" or a bump on the head can be serious. You can't see a concussion and most sports concussions occur without loss of consciousness. Signs and symptoms of concussion may show up right after the injury or can take hours or days to fully appear. If your child reports any symptoms of concussion, or if you notice the symptoms or signs of concussion yourself, seek medical attention right away.

Symptoms may include one or more of the following:

* Headaches * Amnesia	* Balance problems or dizziness * Blurred, double, or fuzzy	* Feeling foggy or groggy * Concentration or memory
* Pressure in head'	vision * Irritability	problems
* Nausea or vomiting	* Sensitivity to light or noise	* Forgetful
* Fatigue or low energy	* More emotional	* Change in sleep patterns
* Neck pain	* Feeling sluggish or slowed	* Repeating the same
* Sadness	down	question/comment * Nervousness
	* Confusion	or anxiety
		* "Don't feel right"

Signs observed by teammates, parents and coaches include:

What can happen if my child keeps on playing with a concussion or returns too soon?

Athletes with the signs and symptoms of concussion should be removed from play immediately. Continuing to play with the signs and symptoms of a concussion leaves the young athlete especially vulnerable to greater injury. There is an increased risk of significant damage from a concussion for a period of time after that concussion occurs, particularly if the athlete suffers another concussion before completely recovering from the first one. This can lead to prolonged recovery, or even to severe brain swelling (second impact syndrome) with devastating and even fatal consequences. It is well known that adolescent or teenage athletes will often fail to report symptoms of injuries. Concussions are no different. As a result, education of administrators, coaches, parents and students is the key to student-athlete's safety.

If you think Your child has suffered a concussion

Any athlete even suspected of suffering a concussion should be removed from the game or practice immediately. No athlete may return to activity after an apparent head injury or concussion, regardless of how mild it seems or how quickly symptoms clear, without medical clearance. Close observation of the athlete should continue for several hours. IHSA Policy requires athletes to provide their school with written clearance from either a physician licensed to practice medicine in all its branches or a certified athletic trainer working in conjunction with a physician licensed to practice medicine in all its branches prior to returning to play or practice following a concussion or after being removed from an interscholastic contest due to a possible head injury or concussion and not cleared to return to that same contest. In accordance with state law, all IHSA member schools are required to follow this policy.

You should also inform your child's coach if you think that your child may have a concussion. Remember it's better to miss one game than miss the whole season. And when in doubt, the athlete sits out.

For current and up-to-date information on concussions you can go to: https://www.cdc.gov/headsup/youthsports/index.html
