River Forest District 90 Early Entrance

Board Policy 7:50 addresses age of school admissions including consideration for those students seeking early entrance to Kindergarten or First Grade. In cases where early entrance/acceleration is a consideration, the District will use a framework for assessment and decision making based on the Iowa Acceleration Scale. The assessments include the recommended ability, aptitude, and achievement assessments endorsed as part of the Iowa Acceleration Scale. This includes an assessment of social development and school readiness skills that seek to include input from parents and appropriate staff members. Requests for acceleration should be directed to the building principal based on a child's anticipated attendance center (Lincoln or Willard). Requests for consideration should be brought to the principal's attention on or before May 31 of the school year prior to anticipated enrollment.
