# Formative and Summative Assessment

Formative assessment is ongoing, (formal or informal) intended to monitor student learning in order to provide feedback to improve teaching and student learning.

Summative assessment evaluates student learning at the end of an instructional unit against a standard or a benchmark.

# What is student growth versus student achievement?

Growth measures how students progress over time.

Achievement measures a single point in time that evaluates how well a student performs against a standard or set of standards.

# Considerations

- Different cohort groups limit ability to view data comparatively by grade
- Cohort size/composition varying from year to year can result in data volatility
- Results are a snapshot of a single point in time
- Results for cohort groups should be analyzed across multiple years to view longer-term trends

# 2015-2018 Measures of Academic Progress (MAP)

- Aligned with the Illinois Learning Standards for math and English language arts (ELA)
- Adapted to the individual students taking assessment
- Designed to track student growth over time
- Intended to be a snapshot of current student performance, not an evaluation of courses
