*The Colleen Brown Transportation YOU High School Scholarship is named as a memorial to Colleen Brown, P.E., a former PennDOT engineer and transportation colleague. Colleen grew up in the City of Lancaster and decided early on that she wanted to be an engineer. After doing research of different college engineering programs, she decided to attend the University of Pittsburgh at Johnstown because she thought their program would give her the hands-on education she was looking for. She graduated magna cum laude with a bachelor's degree in civil engineering. In 1984, not long after graduation, she started working for the Pennsylvania Department of Transportation (PennDOT) in the Civil Engineer Training Program in District 8-0 in Harrisburg. In October 1997, Colleen made the move to PennDOT Central Office as a Project Development Engineer where she was instrumental in guiding her Districts' efforts in the design of major projects such as SR 0202, Section 700 in Bucks County, Exit 17 on Interstate 81, and numerous other highway and bridge projects. Colleen was a highly respected engineer and was well-liked by all who worked with her. She enjoyed living life to the fullest by spending time with family and friends and being active – whether it was traveling, running, hiking or skiing. She had a twinkle in her eye, an energetic "get it done" attitude, and a quick sense of humor. In September 2010, Colleen passed away after a courageous battle with pancreatic cancer. She was 49 years old and had worked as an engineer for PennDOT for 26 years.
